Hyderabad, Telangana, India

## Summary

I tackle the most pressing challenges in technology and engineering by championing innovation, being relentlessly user-centric, and leading high-caliber teams with empathy and vision.

With over 19 years of diverse experience in cloud modernization and software development, I've adopted a data-driven and structured approach to solutions. My journey—from my time at Deloitte Consulting through to my current role at Aqua Security—has shaped my belief that understanding people and fostering collaboration are just as crucial as technical expertise. Whether mentoring engineers or strategizing with senior executives, I strive to create an environment where ideas flourish and real transformation occurs.

In the realm of technology, I am wholeheartedly optimistic about how we can sculpt a future filled with opportunities. The solutions my teams have developed not only reduce operational costs but also enhance scalability and security—leading to an impressive 97% client satisfaction rate. I take pride in building robust cloud-native systems that drive substantial revenue and create lasting impact, always emphasizing deliverables that are not only innovative but also commercially viable at scale. My dedication to nurturing talent is demonstrated by my role as a mentor, guiding engineers towards leadership and success.

At Aqua Security, I am focused on spearheading advanced cloud security initiatives that redefine the industry landscape. My commitment goes beyond mere job responsibilities—it's my passion. Let's connect and collaborate for mutual success.

## Experience

**Splunk**

Senior Engineering Manager

June 2025 - Present (7 months)

As a Senior Engineering Manager at Splunk, I lead a talented engineering team responsible for the development and innovation of the IT Service Intelligence (ITSI) product. My role focuses on driving AI-powered solutions and advanced analytics to help IT operations teams gain real-time insights, optimize performance, and proactively manage critical services.

**Aqua Security**

3 years 2 months

Senior Engineering Manager

May 2024 - May 2025 (1 year 1 month)

Hyderabad, Telangana, India

In my role at Aqua Security, I spearhead the design and development of innovative cloud security solutions across AWS, Azure, and GCP, driving strategic initiatives that have reshaped our security landscape. I focus on talent acquisition and coaching to cultivate high-performing teams while collaborating with Product Management to define impactful cloud security roadmaps. My commitment to operational excellence ensures that we deliver high-quality solutions that exceed client expectations, all while managing resources to achieve complex project objectives on time and on budget.

**Engineering Manager**

April 2022 - April 2024 (2 years 1 month)

Hyderabad, Telangana, India

**Vertafore**

Senior Manager – Product Development

April 2021 - April 2022 (1 year 1 month)

Hyderabad, Telangana, India

At Vertafore, I led and optimized cross-functional engineering teams across multiple countries, focusing on fostering a high-performance culture. I directed the lifecycle management of several product lines, ensuring they aligned with business goals and enhanced operational efficiency. By implementing SAFE

Agile methodologies, I improved project visibility and established efficient workflows that significantly boosted team productivity, while also serving as the key liaison among stakeholders to streamline communication and delivery timelines.

### **Deloitte**

13 years 1 month

#### **Technology Manager**

September 2018 - March 2021 (2 years 7 months)

In my role as Technology Manager at Deloitte, I focused on enhancing system performance and client satisfaction through Agile methodologies, achieving substantial reductions in deployment cycles and downtime. I led high-performing teams, aligning technical strategies with business objectives, while managing project budgets and resources to ensure the timely delivery of impactful software solutions. My commitment to innovation resulted in improved scalability and operational efficiency, significantly increasing client retention and satisfaction across key projects. Additionally, I spearheaded the Bot Communication Excellence team, where I created an enterprise-level Bot Framework utilized in Public Sector Unemployment Insurance projects, further showcasing my dedication to leveraging technology for operational enhancements and client success.

#### **Senior Consultant**

September 2013 - September 2018 (5 years 1 month)

During my time as a Senior Consultant, I specialized in developing solutions that met diverse client needs, driving significant business outcomes through technical innovation. My leadership in Agile transformations improved project efficiency and collaboration among teams while ensuring timely delivery. I effectively managed communications between stakeholders to facilitate project success and identified and resolved system bottlenecks to enhance overall reliability and performance. In addition, I delivered training on SQL Server 2016 features, including Auditing and Data Masking, which benefited public sector projects by reducing repetitive code and ensuring secure data handling, thereby reinforcing our commitment to delivering high-quality and secure solutions.

#### **Consultant**

September 2010 - September 2013 (3 years 1 month)

India & US

#### **Analyst**

March 2008 - September 2010 (2 years 7 months)  
India & US

Tata Consultancy Services  
Assistant System Engineer  
October 2005 - March 2008 (2 years 6 months)  
Hyderabad, Telangana, India
